What is the service

Unless stated above our service is based on the owner packing all china, glass and personal effects into industry standard boxes (materials not included). The distance from the vehicle is 10 meters to the delivery address a one or two storey dwelling.

Suitability of goods to move

Standard furniture fits through standard doors. When we move goods they must be of sound structure so as not to collapse whilst being carried by one or two men and boxes are not overloaded so as the integrity collapses when stacked 6 high. Where large furniture has to be up ended to due to the access or internal layout problems of the dwelling you must specify that you do not want our staff to attempt to take that risk otherwise you have given authority to place each piece of furniture in the room as you have directed and that may leave some marks on the dwelling or furniture.
